

Moving Light Assistant v1.3 Example Show Document

This show file created by Chris Hirst is a show document for a fictitious show 'Cake The Musical' (you never know, it may come to a stage near you sometime) that allows you to look through an example of how the application can be used to document the moving lights in a production. The console data was imported from a Grand MA 1 console. With the application in 'Demo/Reader' mode you will be able to explore the document, but will be unable to make any changes.

24th June - Updated to v1.1 document.

19th July 2015 - Updates to v1.2 document.

25th January 2017 - Checked for v1.3.
